cv@flowin.space 

I'm a **full-stack creator** bridging web development, design and CSS skills. I started as a graphic designer before studying **computer science** and **digital humanities**.

I am curiosity-driven, detail-oriented. I **plan, test, iterate, and refine** across the product's life-cycle, from design to QA. My goal is to define **design choices** that produce less and **cleaner code**, to proactively **prevent bugs** and unlock new **features** with ease.

I always aim to **balance usability, beauty** and do-ability when I build apps, systems, **components and tools** in order to **empower users and developers**.
Better workflows for teams and more **consistent and enjoyable products**.
